

Zombie Mobile

One day you wake up to an ever-changing world, you see how things change in the media, you see people come and go i.e. “here today and gone tomorrow”. Then you begin to see how Technology seems to make people retarded and see people glued to their Mobile Phone Screens. You also see people getting a kick of causing nothing but trouble in videos all just for views, you even see them getting a kick out of seeing people getting hurt or even getting killed or commit suicide.

One day you see people not watch where they are going, as people seem to have lost all hope and the will to fight back, people seem be busy glued to their Phones to the point, where they end up colliding and getting killed by a Wall, Vehicle or thrown off their Bike by a Fence!

One day you begin to see how things portrayed in media seems to be unfolding i.e. AI, that people back then always did say that AI would be doing a takeover bid and your life is ran by it. Your thoughts and actions also monitored by AI, to the point where you would have no freedom and become a slave!

The future of mankind, is bleak to the point of extinction!
